

## CLAIMS LISTING

This listing of claims will replace all prior versions in the application.

1. (Previously Presented) A glue for controlling pests that attack wood or wood products comprising a resin and bifenthrin, wherein the bifenthrin has a mean particle size of 1-10  $\mu\text{m}$ .
2. (Previously Presented) The glue of claim 1, further comprising one or more additives.

Claims 3-4. (Cancelled)

5. (Currently Amended) The glue of claim 1, wherein the glue concentration of bifenthrin in the glue comprises about between about 25 and 100 grams bifenthrin of active ingredient per cubic meter ( $\text{g ac/m}^3$ ) and 100 grams of active ingredient per cubic meter ( $\text{g ac/m}^3$ ).

6. (Previously Presented) The glue of claim 1, wherein the resin is a phenol formaldehyde resin.

Claims 7-20. (Cancelled)

21. (Previously Presented) The glue of claim 2, wherein the additives comprise a fungicide, fire retardant, or combinations thereof.

22. (Currently Amended) The glue of claim 2, wherein the one or more additives improve ~~the~~ spreadability.

23. (Previously Presented) The glue of claim 22, wherein the additive is a flour.

24. (Previously Presented) The glue of claim 1, wherein the resin is a melamine urea formaldehyde, a urea formaldehyde, a resorcinol, a polyurethane, an isocyanate, a polyvinyl chloride (PVC), an acrylic, or an isocyanate polyethylene or combinations thereof.

25. (Previously Presented) The glue of claim 1, wherein the wood product is Plywood, Laminated Veneer Lumber (LVL), Finger jointed product, Oriented stranded boards (SB), Stranded Boards (SB), Glue laminated Lumber (Glu-Lam), Particle boards, Medium Density Boards (MDF), or Solid wood or combinations thereof.

26. (Previously Presented) The glue of claim 23, wherein the flour comprises wheat flour or macadamia flour.
